Approval of further KLEIBERIT PUR Adhesives and Primers in accordance with RAL GZ 716

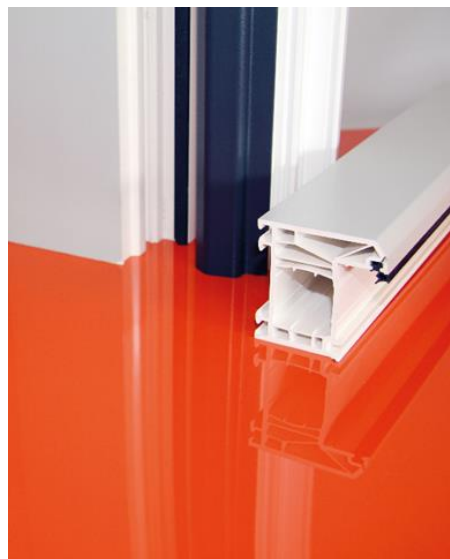

Test Certificates received from SKZ in accordance with new RAL

Following the introduction of the new RAL the desire for hydrolytically stable products, which will give the end-user a wider processing window, got increasingly bigger. KLEIBERIT invested lots of effort to achieve this target and with the adhesive KLEIBERIT 704.3 managed to introduce a new product to the market which complies with these customer requirements. Best hydrolysis stability with the processability our customers are used to from KLEIBERIT 704.5

At the same time there is an increased demand for NEP free primers; here also KLEIBERIT introduces a new development to the market with the primer KLEIBERIT 840.3; this can be processed with felt or vacuum-system application and harmonizes superbly with the RAL approved adhesives.

Both new developments have been examined at the SKZ and have fulfilled the RAL GZ 716 criteria with the best application technology values.

At the same time we could test the adhesives KLEIBERIT 257.7 (processed with 5% hardener KLEIBERIT 807.0) and primer KLEIBERIT 831.2 at the SKZ and both products have passed the examinations. The released products can be found on the website Quality Assurance Association Plastic window systems (www.gkfp.de – under Admitted components).

Below an overview of our latest developments:

**KLEIBERIT 704.3 PUR SK -
New Premium Adhesive for Window Profile wrapping**

- Suitable for the usage with all common foils on the market
- Is characterized by very good hydrolysis resistance (also for MX and PX foils) and a wide processing window

**KLEIBERIT 840.3 Primer -
New NEP-free Primer for Window Profile wrapping**

- Can be processed with felt and vacuum-system application systems
- Suitable for the usage with all common window profiles on the market

Therefore the following products are RAL approved:

Primers:

KLEIBERIT 831.0

KLEIBERIT 831.2

KLEIBERIT 840.3

KLEIBERIT 840.4

KLEIBERIT 840.5

KLEIBERIT 840.6

KLEIBERIT 840.7

KLEIBERIT 848.1

Adhesives:

**KLEIBERIT 257.7 + 5% KLEIBERIT 870.0
hardener**

KLEIBERIT 704.3

KLEIBERIT 704.5

KLEIBERIT 704.6

KLEIBERIT 704.7

KLEIBERIT 704.8

Note: KLEIBERIT has the most extensive and future oriented product portfolio with RAL Approval! Please coordinate your sales activities and the corresponding product selection with Mr. Wolfgang Hormuth respectively the AWETA

Info: the „SKZ“ – SKZ - TeConA GmbH has been renamed into SKZ - Testing GmbH end July; however the range of services hasn't changed!
